

July 9, 2015

DeLaval is committed to improving the environmental and social performance of dairy operations across Canada. Supporting our customers to become more sustainable through our various solutions and services is also an important part of our vision. We are very supportive of the initiatives taken by Canadian dairy farmers to improve their sustainability via such initiatives as proAction and the Dairy Farm Sustainability Award.

We are proud to team up with dairy producers on our common sustainability goals of improving farm profitability and animal comfort while reducing the environmental footprint.

Regards,

**Andrew RITCHIE**  
Managing Director  
DeLaval Canada
