

## Biosecurity

# On-Farm Validation Criteria

1. In the past year, have you completed the biosecurity risk assessment with a veterinarian to identify and address biosecurity risks on your farm?
2. Do you record disease events for, at minimum, cows with these signs (abortion, lameness, mastitis, diarrhea, pneumonia, fever, death) and calves with these signs (diarrhea, pneumonia, fever, death)?
3. Have you established and implemented an SOP, in consultation with your veterinarian, for vaccinating against specific diseases of concern?
4. Have you established and implemented an SOP, in consultation with your veterinarian, to prevent the introduction of infectious diseases when bringing new animals into your facilities from other herds?
5. Have you established and implemented an SOP, in consultation with your veterinarian, to prevent the introduction of infectious diseases by animal returning to your facilities from other herds, cattle shows, etc.
6. Have you established and implemented an SOP, in consultation with your veterinarian, to prevent the introduction of infectious diseases by family, employees, farm visitors and service providers?
7. Do you have visible signage posted on the farm informing all visitors where to report, who to contact, and areas of restricted access upon arrival?
