

## Food Safety

# Fact Sheet: Computer Programs and Food Safety Records

Dairy Farmers of Canada (DFC) is pleased that a number of computer software companies have included all or part of the Food Safety program (previously known as the Canadian Quality Milk (CQM) program) record keeping requirements in their dairy herd management software programs, enabling farmers to keep records electronically.

DFC offers to review any software program that requests a review. DFC simply reviews the program to determine if the program enables a farmer to enter all of the record keeping information that the Food Safety program requires.

DFC recognizes two categories of compliance: complete and partial. A software program has to contain at least one complete record to be included on the partial list. If a company has not requested a review, it will not appear on either list; therefore, the lists may not be complete. DFC relies on the companies listed below to inform it of any changes they make to their software programs in order to keep this list current.

### **Complete: Software Programs that contain ALL of the Food Safety record keeping requirements:**

1. VAMPP: [www.vampp.com](http://www.vampp.com)
2. Dairy Comp Scout / 305 program with the Canadian Quality Milk module, released with the January 2007 annual update:  
[www.canwestdhi.com/dairycomp.htm](http://www.canwestdhi.com/dairycomp.htm)
3. SigaDairy Farm Software: [www.siga.net](http://www.siga.net)
4. DairyPlan C21 version 5.240 with the new 5.240 Canadian language file:  
[www.westfalia.com](http://www.westfalia.com)
5. Lac-T: [www.lac-t.com](http://www.lac-t.com) (Note: Lac-T is replacing SigaDairy Farm Software and DS@HR).
6. CQM Logger, Version 62:  
[www.cqmlogger.ca](http://www.cqmlogger.ca)
7. VetCheck, Version 5.2 or greater:  
[www.vcidairy.com](http://www.vcidairy.com)
8. SmartDairy® HerdMetrix™, Version 4.0 or greater: [www.mysmartdairy.com](http://www.mysmartdairy.com)
9. BouMatic Robotics' HerdMetrix, Version number: 4.1 or greater: [www.uniform-agri.com](http://www.uniform-agri.com)
10. UNIFORM, Version number: 4.1 or greater: [www.uniform-agri.com](http://www.uniform-agri.com)
11. Insentec's SATURNUS 20.20, Version number 4.1 or greater: [www.insentec.eu](http://www.insentec.eu)
12. SAC's TIM (Total Integrated Milking), Version number: 4.1 or greater:  
[www.sac.eu](http://www.sac.eu)

**Partial: Software Programs that contain SOME of the Food Safety record keeping requirements (records identified):**

1. DS@HR Inc meets requirements for Records 9, 10 and 11: [www.dsahr.ca](http://www.dsahr.ca)
2. T4C: Time for Cows, Version 3.2.9.28 or greater, meets requirements for Records 1 to 7, 9, 10 and 11: [www.lely.com](http://www.lely.com)

**Please note:** farmers can choose whichever software program they wish to use, whether it is included on the lists above or not. Also, farmers do not have to keep records electronically; they can keep records on paper.

DFC is pleased to see the dairy industry respond to farmers' needs and show that the Food Safety program is an important element of the packages that they are offering to farmers.
